

Dr. David M. Kenton

Career

After completing my internship/residency and fellowship, I was one of the attending cardiologists and internists for the Northridge Medical Center, Delray Community Hospital, North Broward Medical Center, and West Boca Medical Center. Recently, I've been a cardiologist and internist for several different clinics, including, East-West Physicians and L&M Medical Clinic. I also did VIP 24 hour house calls in Palm Beach, Broward, and Dade counties for Doctors Now for one-on-one personalized services.

My experience includes aesthetic medicine involving botox, fillers, PRP for hair regeneration, PRP facial regeneration and scar improvement, medical weight loss, and testosterone replacement therapy.

I am looking forward to be joining Emilio Castaneda PLLC to continue my cardiology and preventive medicine practice.

Focus

I'm passionate about giving my patients the most up to date and advanced care that I can provide. I am always looking into the latest research and tools to do just that. Some of my professional interests include preventative care in cardiology, regenerative medicine involving stem cell research and therapy, exosomes and anti-aging.

Oceanography

I knew I loved medicine, but I also loved collecting specimens, observing the tides, doing everything I could to soak up knowledge about the vast oceans around us. I spent a good deal of time near the ocean as a child.
